

DWMP NEWS

Date: July 2020

Issue number: 2

INTRODUCTION

Hi everyone and welcome to our second DWMP Newsletter. With everything happening worldwide right now we are grateful for any time you can take to keep up-to-date with the DWMP-related work. This newsletter will also be posted on our website at:

<https://www.nwl.co.uk/services/sewerage/drainage-and-wastewater-management-plans/>.

UPDATE SINCE LAST NEWSLETTER

We are excited to be starting Phase 1 of our customer research in July forming an on line community, where customers will have the opportunity to co create the way the DWMP is shaped for customers use.

We will also be starting our internal stakeholder reviews on the Baseline Risk And Vulnerability Assessments (BRAVA) where internal stakeholders can comment on the BRAVA outcomes in each of the seven strategic planning areas and the risks which are highlighted.

We are planning our first external strategic planning group workshop where there will be the opportunity to agree Terms of Reference and develop a plan of continual engagement in partnership. We will keep you posted!

NATIONAL PICTURE

Over the last month the DWMP BRAVA Task and Finish Group have finalised a series of methodology documents which will be used to help define national reporting for six common planning objectives.

The planning objectives are: internal sewer flooding, risk of sewer flooding in a 1 in 50 year storm, storm overflow performance, pollution risk, sewer collapse risk and risk of WwTW quality compliance failure.

STRATEGIC CONTEXT DOCUMENT

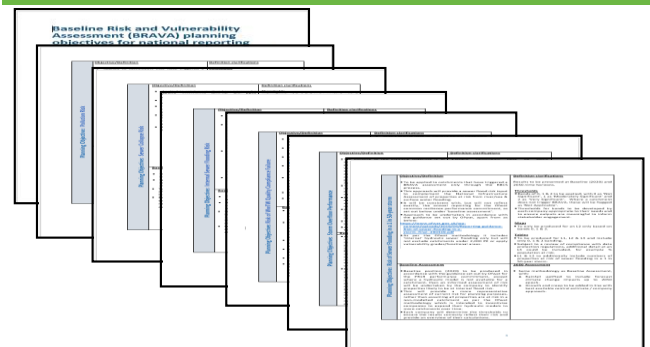

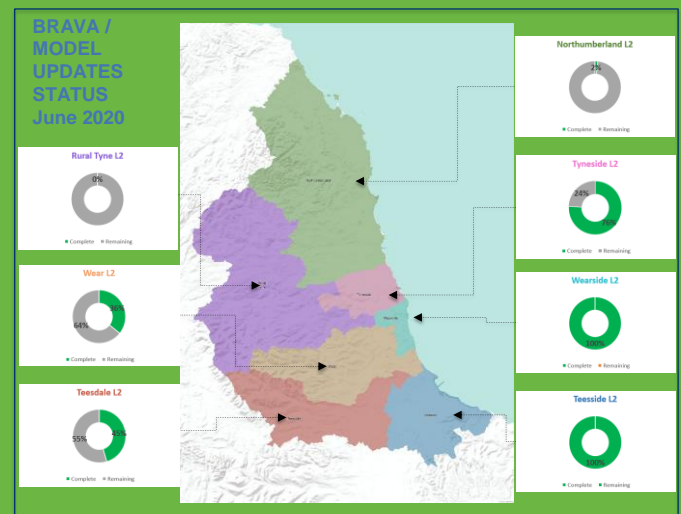

Thanks for all your comments.

We have finalised the Strategic Context Document and it is now available for download on the DWMP website:

BRAVA PROGRESS

The technical team has continued working through the BRAVAs. Below is a graph showing which areas have been covered so far:
