

Indicative primary wholesale charges for 2021/2022

Draft CMA adjusted version

Northumbrian Water Limited (NWL)

Indicative primary wholesale charges for 2021/22

Ofwat published its Wholesale Charging rules under section 66E and 117I of the Water Industry Act 1991, which sets out requirements to publish indicative primary wholesale charges for 2021/22.

NWL supplies water serices in the Northumbrian Water (NW) region and in parts of Essex and Suffolk, which are known as Essex & Suffolk Water (ESW).

Prices in the NW and ESW regions are different and are shown on separate tabs. The structure of water tariffs in the two regions are the same.

NWL also supplies sewerage services in the NW region only.

On 14 February 2020, NWL formally rejected the Final Determination (FD19) published by Ofwat in December 2019 and requested Ofwat to refer it to the Competition and Markets Authority (CMA) for redetermination in accordance with the procedures under the Water Industry Act 1991 (WIA) and our Licence. Ofwat referred our FD19 to the CMA on 19 March 2020 and we submitted our Statement of Case on 2 April 2020. We received a draft redetermination from the CMA on 29 September 2020. We have therefore taken the opportunity to publish two sets of indicative charges. The first set is based on the FD19 and the second set is based on the draft CMA redetermination. At this stage in the proceedings we believe this is the most appropriate way to deal with our current position. We have based this statement on our reasonable expectations of the wholesale charges that will be set for the 2021/22 charging year via the two sources.

As the final outcomes from the CMA redetermination of the FD19 price review are not due for publication until December 2020, we must continue to draw your attention to the greater level of uncertainty around the scope of any such changes to our charges.

The charges in this document are based on the draft CMA redetermination.

Company comments

Note 1: Properties charged on the Assessed Tariff are charged an assessed band for their foul charges, as shown in the foul only column. Surface water and highway drainage are charged on the same basis as the measured tariffs (see the measured sheet).
